PWI Professional Workplace Interaction, Inc.

Business Continuity Readiness Solutions
ENTERPRISE RISK MANAGEMENT *Helping your internal experts become even more effective*

World-Class Readiness

As a leader responsible for others wouldn't it be invaluable to have your Enterprise Risk Management (business continuity, disaster preparedness plans & protocols, response options and recovery resources) at your fingertips?

PWICollaboration is designed to help manage any factor that represents a threat to an organization attaining its strategic objectives. PWICollaboration, a world class tool, will give your leaders, decision makers, safety managers, and first responders the ability to save lives in California from Boston, across town or from around the world during or following a catastrophic event. Critical resources and up to date information will be at your command the first time and every time you have a significant problem or incident. Installation will provide a go to source for standard operating procedures that will help mitigate risk, improve performance, and reduce down time.

Questions?

There is no question that a well constructed disaster preparedness plan will reduce loss of life, mitigate workplace risk, and facilitate getting back in business after a disaster strikes. The deciding questions then become:

- Does it provide real value and is it easy to use?
- Does it address all of my potential risk factors?
- Does it keep all related documents together and are they easily accessible?
- Does it track individual responsibilities and participation?
- Can all of my team members have immediate access?
- Will it grow with my organization?
- Will future employees benefit from teamwork contributions of today?
- Does is offer multiple readiness resources?
- Will we be ready when the time comes?

Questions Answered!

We believe **PWICollaboration Software** not only answers all of these questions in the affirmative, but takes a huge step further.

~ It is a tool that will aid a world-class organization in the ability to return to world-class operational performance in world-class time. ~

Because it is built on a collaboration software platform, it permits customization, ongoing communication, access from remote locations, not to mention a dramatic reduction in the cost of conducting live planning meetings. It will give leaders the ability to focus on the safety and wellbeing of your most important assets, your employees thru a secure source behind your own firewall.
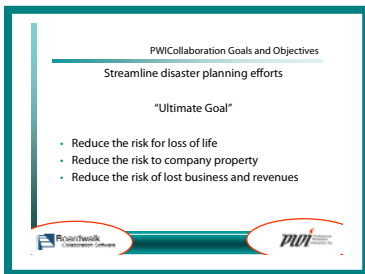

Business Value

The most important business value of the PWICollaboration Software is derived through the analytics and decision making that is enabled through a single focused framework for solving risk exposure.

This is achieved through the ability to consolidate elements of your enterprise risk management processes enabling enhanced decision making.

PWICollaboration Goals and Objectives

Streamline disaster planning efforts

"Ultimate Goal"

- Reduce the risk for loss of life
- Reduce the risk to company property
- Reduce the risk of lost business and revenues

Boardwalk Collaboration Software   PWI

PWICollaboration Software makes it easier

- Team Development and Updating (Pre-Event)
- Mitigation/Prevention (Pre-Event)
- Preparedness (Pre-Event)
- Response, Action Steps & Protocol (Event)
- Recovery & Business Continuation Resources (Post-Event)
- A Cycle of Planning and Preparedness made Easy

Team Development and Maintenance

PWICollaboration comes loaded with support materials that help everyone involved fully understand the roles and responsibilities of first responders. Documents and communication tools are easy to locate and update whenever a change occurs.

Tactical Value

PWICollaboration integrates proactive and reactive processes into a common framework which lowers costs by decreasing the redundancy of separate systems throughout the organization.

PWICollaboration Futures and Benefits

PWICollaboration
becomes your own readiness virtual office

- Web-based solution at your finger tips 24/7
- No matter where you log-in you can access the latest:
  – Disaster plans and protocol documents revisions
  – Comments and status updates
  – Assignments and training
  – Maps and floor plans
  – Communication campaigns
  – Compliance documents
  – Search for any content you need to stay on the same page with your team and collaborators

Proactive Assessment / Risk Mitigation / Prevention

Preparedness - Uniform Site Specific Disaster Plans and Protocols

Strategic Value

PWICollaboration Software is designed to help manage any factor that represents a threat to an organization attaining its strategic objectives.

It is designed to help reduce an organizations operational variability, producing more predictable financial results.
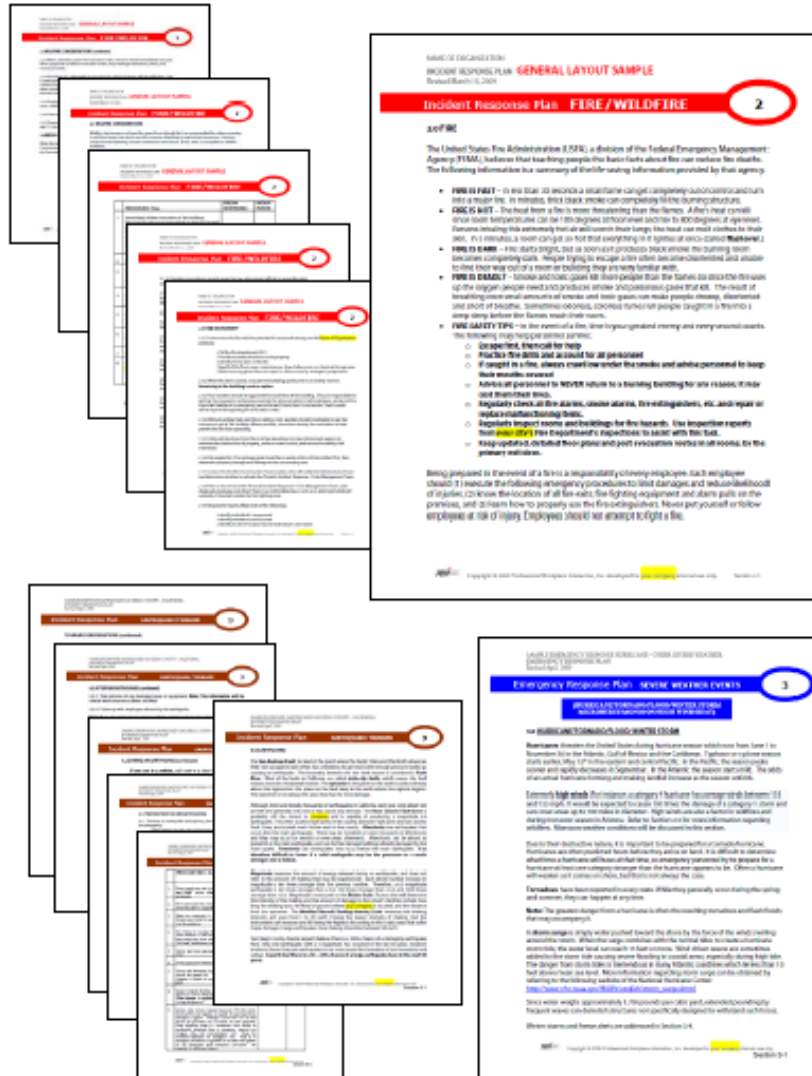

PWICollaboration Futures and Benefits

PWICollaboration Software makes it easier

- Team Development (Pre-Event)
- Mitigation/Prevention (Pre-Event)
- Preparedness (Pre-Event)
- Response, Action Steps & Protocol (Event)
- Recovery & Business Continuation Resources (Post-Event)

PWICollaboration Software will establish system wide plan and protocol uniformity while allowing flexibility for site specific customization.

Uniformity contributes to ease of training, readiness and implementation by first responders. Individuals ultimately responsible for the safety of employees and continuous operations can easily monitor organization wide readiness.

In the event the primary site specific person in charge is unavailable, a secondary incident commander can easily and seamlessly step in and oversee response and recovery efforts.

Establish Critical Business Function timelines.

Summary

When you need to be thoroughly prepared, you require a disaster preparedness partner that never sleeps – **PWICollaboration Software**.

What makes it better than the others? A lot! Number one, unlike any other plan it's built on a collaborative software platform, a living process that educates while you use it. Think about all the things you do when you go to the expense of holding a group meeting – share your thoughts and criticisms, build teams, discuss ideas, review protocols, add new documents, revise old documents, set schedules, plan live rehearsals and drills, and introduce new members to learning the plan, procedures and protocols. PWICollaboration does all this and more. It becomes your readiness virtual office.

With PWICollaboration Software you will be able to quickly log in and access:

- Your most up to date disaster plans and protocols
- All communications between team members
- Assignments and training schedules
- Compliance documents
- Floor plans and maps
- Area assessments
- Site specific customizations

Streamline your enterprise risk management process – get the peace of mind you deserve – install **PWICollaboration Software** today.
